Abstract

Several members of the US West Coast CAT and STOA clubs, namely Buck Trippel, Tom Hall, Darren Mountjoy, Patrick King and Bill Rogers, visited in mid-October. Of course they were looking for Tiger related documentation, and are closely involved with what is known as the TAC authentication scheme, for which the original drawings at the Archive Centre are particularly helpful. During their 5-day visit they also catalogued many other drawings and spent an afternoon at the Coventry Transport Museum inspecting the Jensen records – if you don't know already, it was Jensens who modified the Sunbeam Alpine chassis to take the Tiger's large Ford V8 engine. There is more information about the visit on the Web site.

This document is available from the Rootes Archive Centre Web site at http://tardis.dl.ac.uk/ARCC/Tiger/tiger_drawings/index.html. A PDF format copy of this document can be obtained from http://tardis.dl.ac.uk/ARCC/Tiger/tiger_drawings.pdf. You probably won't want to print it as there are over 100 pages, but it is searchable with a suitable PDF reader.

© **Rootes Archive Centre 2012-13**. The Rootes Archive Centre and Sunbeam Tiger Owners' Club do not accept any responsibility for loss or damage arising either directly or indirectly from the use of information contained in any of their reports or in any communication about their tests or investigations. Whilst we have tried to be as accurate as possible, some errors may have occurred in the cataloguing process or interpretation.

1 Introduction from Graham Vickery

On behalf of the UK Tiger community and the Rootes Archives Centre Trust I would like to put on record our grateful thanks to Buck Trippel, Tom Hall, Darrell Mountjoy, Patrick King and Bill Rogers of the C.A.T and S.T.O.A clubs for coming over here and working tirelessly at the Rootes Archive Centre for 5 days at the engineering drawings conservation "coal face". This was around 20/10/2012.

Also to convey our gratitude for their generous donation of a large scale flat bed scanner that is capable of scanning the very large drawings (12' x3'). Digital preservation has taken a great leap forward.

We all of us have to thank two Trustees of the Archive - James Spencer and Matt Ollman for the tremendous efforts they made in re-housing the Collection (first handed over by Peugeot PSA Ltd. 8 years ago) at the new Banbury Centre and smoothing the way for the US Team visit.

Earlier research work by a couple of members of STOC revealing around 1500 Tiger engineering drawings and microfiches and Matt's Alpine work (2000) was considerably added to by the Team effort and a whole lot of sorting and re-filing was invaluable. It will take a few weeks to sort out the latest discoveries but the cache of drawings for the Alpine and Tiger must now be in excess of 4,500. A massive catalogue of the design and build of the two marques in the making!

For photos of the event see http://tardis.dl.ac.uk/ARCC/Press/tiger_hunt.20.10.12.html.

To date, I'd hazard some 2,000 Tiger drawings have been located of which 80% are in a microfiche format. There's a whole lot more research to do on the Tiger at the Banbury location of the Rootes Archive Centre and I'd welcome a couple volunteers to give me a hand putting this record onto the pedestal it deserves!

Only one of the Rootes marques has been cataloged completely (The Imp, by Bob Allan, Kimberley Benoy and James Spencer); it would be great to make the Tiger and the Alpine next in line.

Full report in "Cats Whiskers" issue 89.

2 Inventory of Tiger Drawings

This document will be updated as work proceeds.

Some highlights of this set include:
